APNOMART Q2 2026
STRATEGIC INSIGHTS

Executive Insight Report

Analyst	**Indukuri Lavanya**
Tool Used	Power BI

Date: October 2026 | **Dataset period:** May–October 2026 (data through 28 October)

INSIGHT 1: Revenue Pattern

Furniture generated the highest sales of ₹3,518,270, representing 21.63% of total sales of ₹16,261,998.30. July was the strongest month at ₹2,957,618.40, while October sales were 16.42% lower at ₹2,472,054.20.

So What: ApnoMart should investigate the reasons for the decline after July and test whether successful Furniture merchandising or promotional practices can be adapted to lower-performing categories.

INSIGHT 2: Profitability Pattern

Office Supplies generated the highest category profit at ₹1,176,657.32, with an average profit margin of 34.51%. Electronics generated ₹558,395.07 in profit and had the lowest average margin at 18.62%; it also had the highest average discount at 14.06%.

So What: The combination of lower margins and higher discounts makes Electronics a priority for review. Run a controlled discount test and compare profit and sales before changing the policy broadly; the dataset shows an association, not proof that discounts caused the lower margin.

INSIGHT 3: Customer Behaviour Pattern

The Corporate segment contributed the most sales at ₹4,311,027.50 (26.51% of total sales) across 307 orders. Cash was the most frequently used payment method, with 258 orders and ₹3,574,076.95 in sales; however, the five payment methods were relatively distributed.

So What: ApnoMart should test a repeat-purchase or tailored-offer programme for Corporate customers and continue supporting multiple payment options rather than assuming one method suits everyone.

STRATEGIC RECOMMENDATION

Next quarter, run a controlled Electronics discount-optimisation pilot: test lower discounts on selected products, compare sales and profit margin with a comparable baseline, and scale the change only if profit improves without an unacceptable sales decline. Use Office Supplies as a benchmark for profitable category practices, and review the results monthly.
